## North Star Cherry

A new dwarf cherry. Extremely hardy, and bears very young. Wonderful for pies. 1 to 2 ft. \$1.80; 2 to 3 ft. \$2.40.

Dwarf fruit trees are enabling millions of people with only small areas for fruit trees, and city families to have a variety of fruit never before possible. Even in small yards there is room for a dozen or more dwarf trees, providing fruit from early summer to late fall. The fruit from dwarf trees is just as large as that grown on standard size trees, and just as delicious. The only difference is that you pick the fruit without a ladder and caring for the trees is a much more simple job. Plant a variety of dwarf trees this year and have a real home fruit garden.

## ORIENTAL ORCHIDS OF THE GARDEN

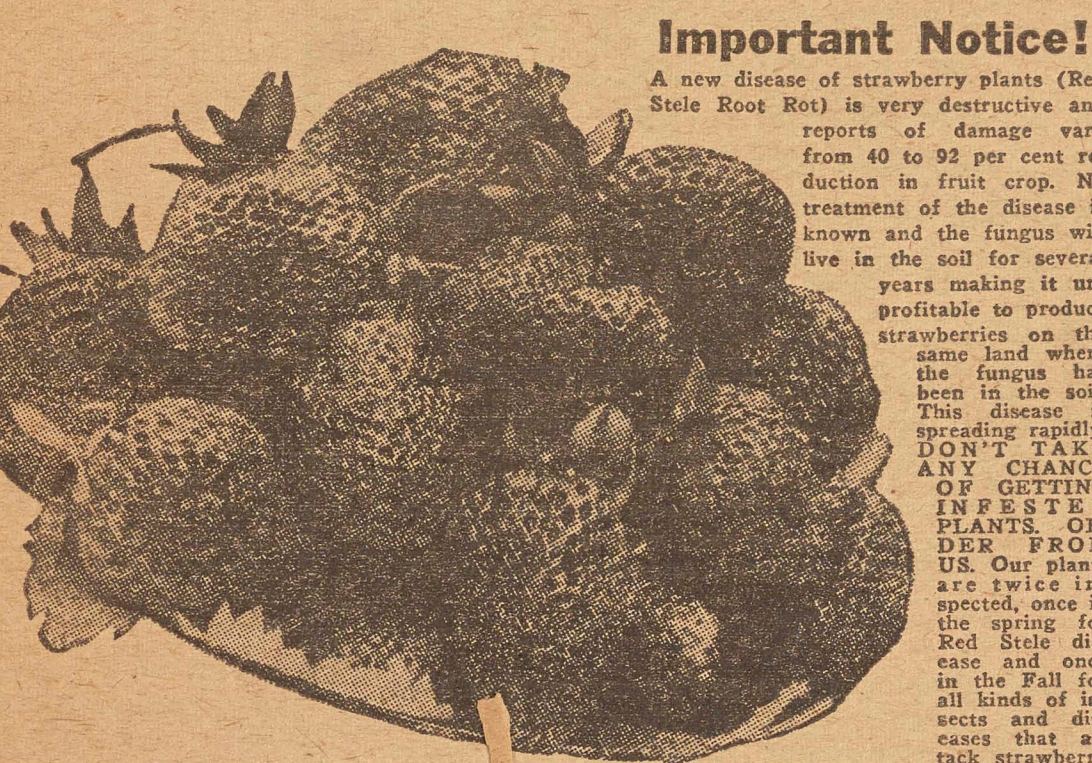

(IRIS KAEMPFERI)  
Your garden is not complete until you have this beautiful flower growing in your perennial collection. Now you can grow your own Orchids by planting Iris Kaempferi, which is entirely different from all other iris and comes into bloom as the early summer fades, continuing to bloom until mid-July. The huge blooms of velvety texture measure 6 to 8 inches across. The leaves are long, narrow and gracefully formed, and the plants remain decorative even after the blooming period is over. It is no wonder that the Kaempferi is called the "Orchid of the Garden." Excellent for cutting (it will grow 3 to 4 feet high. Plants thrive in well drained fertile soil (it is fatal to select a location where water stands during winter).  
Mixture of Colors: Rose, White, French Blue, Purple-Violet, Lavender, Variegated.

## BIG JUICY STRAWBERRIES

**100 25 for 89c for \$2.39 1000 for \$13.89**

**Important Notice!**  
A new disease of strawberry plants (Red Stele Root Rot) is very destructive and reports of damage vary from 40 to 92 per cent reduction in fruit crop. No treatment of the disease is known and the fungus will live in the soil for several years making it unprofitable to produce strawberries on the same land where the fungus has been in the soil. This disease is spreading rapidly. DON'T TAKE ANY CHANCE OF GETTING INFESTED PLANTS. ORDER FROM US. Our plants are twice inspected, once in the spring for Red Stele disease and once in the fall for all kinds of insects and diseases that attack strawberry plants. Our plants are found to be apparently free of all diseases. ORDER OUR PLANTS FOR HEALTHY STURDY PLANTS. DON'T GAMBLE ON CHEAP PLANTS AND LOSE YOUR FRUIT CROP.

## BENCO'S NEW GOLDEN QUEEN RASPBERRY

A real novelty! A new sensational yellow Raspberry of the black Raspberry type. It is a chance seedling that is a cross between the red Raspberry and the black Raspberry. It is both a novelty shrub and a great fruit producer — the berry being of a rich golden color of medium size. Its flavor is entirely different from any berry grown in a blend between the red and black Raspberry. In many cases it is grown in preference to the red and black Raspberries, because of its sugar-sweet taste. Just before the berry fully matures it is a rich yellow color, and when fully ripe reaches a rich golden yellow. It is truly a novelty shrub for your garden — the most unusual feature of this new variety is that after the first frost the canes will turn a rich yellow color, which is very outstanding during the winter months. The fruit can be successfully preserved. Again they are very outstanding in a glass fruit jar, for the berries retain their rich golden color. Get some for your garden now!

## NEW BLUE BERRIES

**GROW YOUR OWN BLUEBERRIES—PICK THEM FRESH OFF THE BUSH**  
Cultivated blueberries are hardy shrubs of rare beauty; they are doubly valuable because they are fruitful and ornamental all year.  
As a commercial proposition it is one of the most profitable fruits to grow. There is a big market. They make good money in a very short time, for you can begin picking the second or third season after planting.  
Choose piece of ground easily supplied with moisture during dry summer months; it should not, however, at any time, become water-logged. Plant in full sun if possible; they will also do well in partial shade. Be sure the soil is acid. Give only shallow cultivation, not over 2 to 3 inches deep, so as to leave the roots undisturbed.  
**CONCORD**. Bush of upright habit at maturity exceeding 6 feet in height. The berries are large.  
**JERSEY**. Very large and vigorous in habit. The light blue berries are very large.  
**Each 3 12 24 36 48 60 72 84 96 108 120**  
**\$1.98 \$5.50 \$9.50 \$16.00**  
We recommend ordering both varieties so they will cross-pollinate and fruit freely.

## EVERBEARING FIG

Under 1 ft., 88c; 1 to 2 ft., 98c; 2 to 3 ft., \$1.10  
Ripens its fruit from July until frost and each tree will produce fruit first year. Bears on its new growth. Light straw to brown in color, medium size and very sweet. Does not crack easily. Extra good for preserves or eating fresh.  
Figs should be planted more extensively. Do not let the sprouts or suckers grow, but prune the trees so as to have clean bodies at least two feet high. Cut tops back to six or twelve inches above the ground when planting. Such trees will bear fruit and will stand much colder weather than if the sprouts are allowed to grow.

## TWO BRAND NEW STRAWBERRIES

**NEW ARMORE**—Most recent introduction by University of Missouri, Blakemore X Aroma cross. Large size, firm fruit, which is dark red all the way through. Even though it is an extra large Strawberry, it does not have a core or cavity in the center. Holds up extra well in shipping. All the flowers will mature fruit, and will hold size well until end of season. Ripens 10 days later than Premier. All reports from growers are very enthusiastic. We believe this berry will become a great commercial variety.

**WINN'S OZARK BEAUTY** (Everbearing)—The healthiest and most productive strawberry we have ever seen. Bears large berries of the finest flavor one could want, and lots of them. Being introduced for the first time in Spring of 1956.

**OZARK BEAUTY**—Superior to any blackberry grown where it has become known, this blackberry is hardy, stands drought. It is almost free from seed and has no objectionable core. It has little or no juice, the pits being filled with a thick syrup or flesh of the berry. Ripens just after Early Harvest. The berries are very large and best quality. You will make no mistake in ordering Ozark Beauty.

## Large, Meaty EVERBEARING BLACKBERRY (TREE FORM)

This is one of the biggest berries ever developed. Bear enormous crops, beginning to ripen just after the Early Harvest and continue almost until frost; the berry is very large, of fine quality, melting in your mouth, and does not have a large core. Husky growing plants, standing erect, resembling small trees from 6 to 8 feet high and branch heavily. We have only a very few for the market this year.  
**25 for \$5.50 12 for \$3.00 100 for \$17.50**

## BENCO'S CRYSTAL WHITE BLACKBERRY

You must follow our planting instructions enclosed with each order. ## Our One Objective

Is to furnish you with the very best that is to be had in all kinds of nursery stock, ornamentals, seeds and plants.

BEWARE OF FROST: Nursery stock received during frosty weather should be placed in a cool cellar or some such place, and allowed to thaw out gradually. Don't handle plants until frost is out of them. Don't be in a hurry to open; stock can remain in this condition for several days if packages are covered to exclude air. The plants can then be unpacked for planting or be stored under proper conditions. There will be no damage to stock if handled properly when received.

PLEASE DO NOT ASK US TO CHANGE YOUR ORDER. We handle thousands of orders within a very short season, and it is impractical to locate individual orders for changes. We want to accommodate our customers but it is impossible to find any particular order quickly during the shipping season.
